Let's Start!

Staying safe at work ... our priority!

Learning Outcome

Describe necessity, duty, advice, or strong disapproval in written and spoken situations according to work and social contexts.

Can Do Statements

- I can explain how the workplace health and safety procedures are.
- I can express necessity, duty, and advice.
- I can ask someone to do something.

Ask your partner:

- Do you think companies should be more concerned about the safety of employees? Why or why not?
- What do you think companies can do to create more safe places to work?
- What do you think is more important for a company: to have a health program or a safety program? Why?

Let's Explore!

Mr. Brody talks about his company's Workplace Safety Program, designed to prevent **injury*** and **illness****.

* An "injury" is when you hurt yourself in an accident.

** An "illness" is when you are feeling sick due to a disease.

Instructions: Read the text aloud.

Boris: Now, let's talk about the Workplace Safety Program. We will have it revised next year. It deals with preventing injury and illness to employees. Because you work in an office environment, you might think that there is no danger. In general, that is true.

Adam: All of the offices are on this floor?

Boris: We have several offices on the 16th floor, but we also have some space on floors 15 and 17 as well. There are a few things you've got to keep in mind. You need to know where the emergency exits are located. Remember, in the case of a fire alarm, you mustn't take the elevators. You must walk down the stairs to exit the building. If you hear the alarm, it may be just a drill, but you had better treat it as a real fire. The kitchen is equipped with a fire extinguisher. The kitchen staff has electrical appliances turned off every night.

Kristi: Of course.

Boris: Now, the more dangerous part of our business is the factory where the printing presses are located. We will have you sent there once in a while. I would read the guidelines specific to that area in the safety procedures manual. I'll have a copy e-mailed to you. I just want to highlight a few things. Most printing machinery accidents occur when the presses are in use. To prevent an accident, we have all moving parts tested every week. These areas have protection guards, but you will need to be aware about the dangerous areas. Of course, you needn't attempt to operate the machines yourselves. Only employees who have been properly trained are to be operating the printing press.

Let's Practice!

Mr. Brody explains some safety policies.

Instructions: Use the words from the boxes to correctly complete each sentence.

1

revised

testing

1. We will have the Workplace Safety Program _____ next year.
2. The kitchen staff has the electrical appliances _____ off every night.
3. We will have you _____ there once in a while.
4. I'll have a copy _____ to you.
5. To prevent an accident, we have all moving parts _____ every week.

Let's Practice!

Adam and Kristi read more about the Workplace Safety Program.

Instructions: Write the words from the Word Bank into the corresponding spaces to correctly complete the sentences. Read the sentences aloud. Check your pronunciation with your instructor.

Word Bank

employees / safety / appliances / exits / guards / extinguisher / presses / drill /
alarm / elevators / manual / injury / guidelines

The Workplace _____ Program deals with preventing _____ and illness to _____. You need to know where the emergency _____ are located. If you hear the fire _____, it may be just a _____, but you mustn't take the _____. There is a fire _____ in the kitchen area. Electrical _____ have got to be turned off. Most accidents occur when the printing _____ are being used. These areas have protection _____. I would read the _____ in the _____.

Extension Activity

Make a list of 10 common accidents at work and propose a solution to each one.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Go online. Find at least 10 common accidents that happen in any work environment. Write the list.
- With a partner, discuss how those accidents could have been prevented.
- For each accident, write some suggestions about what could be included in a workplace safety program that would prevent that accident.
- Read your list to a partner or a group for feedback.

Self-Assessment

Yes **No**

I read about common accidents in the workplace.

☐ ☐

I discuss safety in the workplace.

☐ ☐

I write sentences giving suggestions to improve safety in the workplace.

☐ ☐

Target Words

- **drill** (noun): test, training
e.g. If you hear the alarm, it may be just a drill, but you had better treat it as a real fire.
- **fire alarm** (noun): a loud sound (such as the ring of a bell) that warns about the possibility of a fire
e.g. You need to know where the emergency exits are located. Remember, in the case of a fire alarm, you mustn't take the elevators.
- **electrical appliance** (noun): a small device, such as a toaster or microwave, that uses electricity to function
e.g. In the kitchen, any electrical appliances you use have got to be turned off.
- **fire extinguisher** (noun): a device found in houses and offices, used to put out fire
e.g. There is a fire extinguisher in the kitchen area.
- **protection guard** (noun): part of a large machine, like a plastic cover, that stops a person from placing a part of their body in the way of danger
e.g. These areas have protection guards, but you will need to be conscientious about the danger areas.
- **printing press** (noun): the machine used to print books, magazines and other publications
e.g. The more dangerous part of our business is the factory where the printing presses are located.
- **to be equipped** (verb): to have (a piece of equipment)
e.g. The kitchen is equipped with a fire extinguisher.

Learning Points

Causative **Get** and **Have** in the Passive Pattern

You can use **causative get** and **have** in active and passive voices. Let's look at how to use the passive pattern.

When you use the **causative get** and **have** in a passive pattern, it has the meaning of "arrange for someone else to do something". You use this structure when you want to express that you pay or ask someone to do something for you.

The structures are:

get + object + past participle

have + object + past participle

For example:

*I'll **get my jacket cleaned**.*

*I'll **have those reports completed** for you.*

When you use the **passive**, you come across less direct and therefore more polite.

Examples:

- *In the kitchen, any electrical appliances you use **have got to be turned off**.*
- *We **will have you sent there once in a while**.*
- *I'll **have a copy e-mailed to you**.*

Learning Points

Other Verbs to Express Necessity

You can use other verbs, not just modal verbs, to express necessity.

You can use the verb **to be + passive** to express that something needs to be done.

For example:

*Life vests **are to be worn** on the boat.*

*Rules **are to be followed** at all time.*

*The law **is to be respected** when you drive.*

When you use this structure, you sound very official. For this reason, it is a good structure to use in the workplace.

Examples:

- *Only employees who have been properly trained are to be operating the printing press.*
- *All fire alarms are to be treated as a real fire, even if they are really a drill.*
